JOURNAL OF APPLIED ELECTROCHEMISTRY **25** (1995) 1149–1152

Index to Volume 25 (1995)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion and protection

Theoretical validation of the physical scale modelling of the electrical potential characteristics of marine impressed current cathodic protection, 54
Inhibiting effects of benzotriazole on the corrosion of α-Al-bronze in saline water, 137
Sol-gel TiO_2-SiO_2 films as protective coatings against corrosion of 316L stainless steel in H_2SO_4 solutions, 142
Comments on the paper 'Influence of the heat treatment in the electrochemical corrosion of Al-Zn-Mg alloys' by P. L. Cabot *et al*, 179
Reply to the comments of L. Tomcsanyi on the paper 'Influence of the heat treatment in the electrochemical corrosion of Al-Zn-Mg alloys', 180
Use of electrochemical impedance spectroscopy for the study of corrosion protection by polymer coatings, 187
Surface treatment for mitigation of hydrogen absorption and penetration into AISI 4340 steel and Inconel 718 alloy, 212
Electrochemical behaviour of the Al-In alloys in chloride solutions, 252
Evaluation of the inhibition efficiency of acetylenic halo-derivatives by electrochemical methods and solution analysis, 371
Potentiostatic study of the passivation of aluminium alloys in aqueous electrolyte media, 412
Studies of the influence of iodide ions on the synergistic inhibition of the corrosion of mild steel in an acidic solution, 495
Effect of the addition of Cr and Nb on the microstructure and electrochemical corrosion of heat-treatable Al-Zn-Mg alloys, 781
Cathodic reduction and infrared reflectance spectroscopy of basic copper(II) salts on copper substrate, 841
The fractal dimension of corroded aluminium surfaces, 962
Anodic behaviour of zirconium and its alloys in fluorinated nitric media; Dissolution-passivation model, 1031
Comments on the article 'Use of electrochemical impedance spectroscopy for the study of corrosion protection by polymer coatings' by F. Mansfeld, 1143
Reply to comments by R. D. Armstrong and A. T. A. Jenkins on the paper 'Use of EIS for the study of corrosion protection by polymer coatings' by F. Mansfeld, 1145

Effluent and water treatment

Anodic oxidation of phenol in the presence of NaCl for wastewater treatment, 23
Removal of formaldehyde from aqueous solutions via oxygen reduction using a reticulated vitreous carbon cathode cell, 307
Electrochemical investigations of the Ce(III)/Ce(IV) couple related to a Ce(IV)-assisted process for SO_2/NO_x abatement, 967
Electrochemical removal of dissolved oxygen from water, 973

Electrocatalysis and kinetics

Semiconducting properties of TiO_2 films thermally formed at 400°C, 247
In-situ FTIR characterization of the electrooxidation of glassy carbon electrodes, 259
Electrochemical sulphur dioxide oxidation with platinum-aluminium electrocatalysts, 353
Quantitative determination of dispersed platinum in carbon by cyclic voltammetry, 404
Oxygen evolution on electrochemically generated cobalt spinel coating, 462
Methanol electro-oxidation on carbon-supported Pt-WO_{3-x} electrodes in sulphuric acid electrolyte, 528
Hydrogen evolution reaction on Ni-Al-Mo and Ni-Al electrodes prepared by low pressure plasma spraying, 592
Real area and electrocatalysis factors in hydrogen evolution kinetics at electrodeposited Ni-Mo and Ni-Mo-Cd composites: effect of Cd content and nature of substrate, 628
Kinetics and mechanism of the oxygen electroreduction reaction on faceted platinum electrodes in trifluoromethanesulfonic acid solutions, 740
Performance characteristics of a new type of lead dioxide-coated titanium anode, 817
Variation of the dielectric constant of anodic oxide films on titanium with oxygen evolution, 881
Electrochemical studies of methane activation, 899
Formation and reduction of hydrous oxide films on platinum in aqueous solution at 273 K, 913
Hydrogen evolution reaction on electrocatalytic materials highly dispersed on carbon powder, 923
Reduction of metallic surface oxides via an electrochemically-generated redox species, 947
Effect of cathodic reduction on catalytic activity of amorphous alloy electrodes for electro oxidation of sulfite, 953
Electrochemical promotion of IrO_2 catalyst for the gas phase combustion of ethylene, 978
Electrocatalytic properties of mixed transition metal tellurides (Chevrel-Phases) for oxygen reduction, 1004
Electrochemical behaviour of modified activated carbons in aqueous and nonaqueous solutions, 1038
Voltammetric study of the Fe-S-Ebonex® system, 1045
Sonovoltammetry at platinum electrodes: surface phenomena and mass transport processes, 1083
Physicochemical and electrocatalytic properties of $LaNiO_3$ prepared by a low-temperature route for anode application in alkaline water electrolysis, 1133

Electrochemical engineering

Generalized expressions for estimating the current efficiency of ion-exchange membrane and diaphragm chlor-alkali cells, 95
Characterization of a flow-by RCV electrode reactor for the removal of heavy metals from dilute solutions, 299

Copper removal from aerated solution containing various metal ions using an undivided rotating cylinder electrode reactor, 340
Modelling of time dependent performance criteria in a three-dimensional cell system during batch recirculation copper recovery, 565
An efficient method for solving the model equations of a two dimensional packed bed electrode, 755
Pressure drop behaviour in a three-dimensional packed bell cell during copper deposition and hydrogen evolution, 864
Application of metallic foams in an electrochemical pulsed flow reactor
Part I: Mass transfer performance, 1105
Potential and current distribution on the surface of a hydrogen gas diffusion anode, 1122

Electrochemical synthesis and production

Electrocatalytic oxidation of benzyl alcohol in alkaline medium on RuO_2-coated titanium electrode, 73
Mechanism of anodic oxidation of chlorate to perchlorate on platinum electrodes, 126
Cathodic reduction of hypochlorite during reduction of dilute sodium chloride solution, 155
Electrolyte partial fluorination of organic compounds
Part XI: Regioselective anodic monofluorination of phenylsulfenylacetate using a flow-cell system, 173
Reduction of maleic acid at a Ti/ceramic TiO_2 cathode, 176
Electrochemical oxidation of isobutanol to isobutyric acid in a flow cell, 279
Electrolysis of weak black liquor
Part II: Effect of process parameters on the energy efficiency of the electrolytic cell, 472
Pilot scale process for hydrodimerization of dimethyl maleate, 479
In-situ degradation of formaldehyde with electrogenerated hypochlorite ion, 483
Bioelectropolymerization of phenol, 508
Processes for the production of mixtures of caustic soda and hydrogen peroxide via the reduction of oxygen, 613
Synthesis of fluorocyclohexadienes by the electrochemical fluorination of *p*-difluorobenzenes on a preparative scale, 651
An electrochemical technique for the reduction of aromatic nitrocompounds in H_2SO_4 medium on thermally coated Ti/TiO_2 electrodes, 690
Electrochemical oxidation of thiocyanate in a two-phase electrolyte, 792
Electrochemical mediators for total oxidation of chlorinated hydrocarbons: formation kinetics of Ag(II), Co(III) and Ce(IV), 846
Ion transport in a two membrane electrowinning cell for the production of hydrochloric acid, 1009

Electrochromism

Lithiation study of molybdenum oxide thin films: application to an electrochromic system, 797

Energy conversion batteries and fuel cells

Conductive carbon-polypropylene composite electrodes for vanadium redox battery, 29
Effect of silicate adsorption on the double layer capacitance and exchange current density of the $Pb/PbSO_4$ electrode reaction, 80
Bipolar Al/O_2 battery with planar electrodes in alkaline and acidic electrolytes, 114
An oxygen electrode for air consuming proton exchange membrane fuel cells for transportation application, 122
Physical and electrochemical characteristics of nickel hydroxide as a positive material for rechargeable alkaline batteries, 219
Discharge behaviour of tubular lead dioxide electrodes
Part III: Two-dimensional current density distribution, 315
The influence of temperature on the electroreduction of anodically formed passive films on lead electrodes in H_2SO_4 solutions
Part I: Electroreduction of $PbSO_4$ layers, 358
Influence of temperature on the electroreduction of anodically formed passive films on lead electrodes in H_2SO_4 solutions
Part II: Electroreduction of PbO layers, 364
The manganese dioxide electrode
Part XII: Gibbs free energy of H insertion compounds and a planar model, 425
Degradation mechanisms of nickel oxide electrodes in zinc/nickel oxide cells with low-zinc-solubility electrolytes, 433
Heat generation during pulse operation of prototype aluminium electrolytic capacitors, 533
Effect of surface modification using various acids on electrodeposition of lithium, 584
Role of minor alloying elements on the performance of lead-acid battery grids
Part I: Corrosion of Pb-Se alloys, 682
Effects of electrochemically incorporated bismuth on the discharge and recharge of electrodeposited manganese dioxide films in 9M aqueous KOH, 707
Effect of state of charge on impedance spectrum of sealed cells
Part I: Ni-Cd cells, 716
Effect of state of charge on impedance spectrum of sealed cells
Part II: Lead acid batteries, 729
Kinetic aspects of self-discharge of nickel-hydrogen batteries and methods for its prevention, 833
A thin layer, solid-state, primary $Li|Ag_2CrO_4$ polymer battery, 987
Electrochemical impedance of alkaline zinc/manganese dioxide cells containing no added mercury, 1057
Reversible and irreversible heat effects in ZEBRA cells, 1128

Instruments, methods and analysis

Applications of magnetoelectrolysis, 1
A new method for the measurement of the diffusivity of carbon in alpha-iron using an electrochemical cell, 776

Mass transfer and hydrodynamics

Electrochemical study of mass transfer in decaying annular swirl flow
Part II: Correlation of mass transfer data, 15

Mass transfer study of the electropolishing of vertical cylinders with active ends under natural convection conditions, 149
Enhancement of mass transfer at a spherical electrode in pulsating flow, 267
Electrochemical mass transfer to regular packings in a bubble column, 273
Study of Taylor-Couette flow using a three-segment electrodiffusion probe, 441
Mass transport to reticulated vitreous carbon rotating cylinder electrodes, 450
Natural convection mass transfer inside cylindrical cavities of different orientation, 677
A wall-jet electrode reactor and its application to the study of electrode reaction mechanisms
Part I: Design and construction, 1017
A wall-jet electrode reactor and its application to the study of electrode reaction mechanisms
Part II: A general computational method for the mass transport problems involved, 1023

Materials electrochemistry

Preparation of solid polymer electrolyte composites: investigation of the ion-exchange process, 227
Preparation of solid polymer electrolyte composites: investigation of the precipitation process, 233
Electropolymerization of poly(2-vinylpyridine) films on zinc, 284
Effect of sulphate anions on tunnel etching of aluminium, 501
Electrochemical codeposition of inert particles in a metallic matrix, 519
Influence of zeolithe on electrochemical and physicochemical properties of polyethylene oxide solid electrolyte, 857
Effect on discharge of the heat treatment of graphite fluoride under a hydrogen atmosphere, 869
Electrode stabilities of copper-containing misch metal-nickel-based hydride forming alloys, 874
Electrodeposition of nickel/silicon carbide composite coatings on a rotating disc electrode, 1113

Metal and alloy deposition and dissolution

Improved corrosion resistance of pulse plated nickel through crystallization control, 347
Electrodeposition and characterization of amorphous Fe-Ni-Cr-based alloys, 376
Mass transfer and electrocrystallization analyses of nanocrystalline nickel production by pulse plating, 384
Complexing power of alkanesulfonate ions: the lead-methanesulfonate system, 408
Electrochemical dissolution of metals of the platinum group by alternating current, 490
Mass transport effects on the electrodeposition of iron-nickel alloys in the presence of additives, 543
Effect of thiourea, benzotriazole and 4,5-dithiaoctane-1,8-disulphonic acid on the kinetics of copper deposition from dilute acid sulphate solutions, 574
Effect of surface active agents on the initial formation of electrodeposited copper layers, 603
Surface pH measurements during nickel electrodeposition, 642
Electrodeposition of Ni-Mo alloys with pulse reverse potentials, 667
Improved current efficiency equation for the electrodeposition of copper, 764
Influence of pH on nickel electrodeposition at low nickel(II) concentrations, 770
Observations of inclusions of polymeric additives in copper electrodeposits by transmission electron microscopy, 890
Jet electrochemical etching of nickel in a sodium chloride medium assisted by a pulsed laser beam, 933
Electrochemical reduction of nickel ions from dilute solutions, 982
Electrodeposition of Ni-W-B amorphous alloys, 1091

Mineral and metallurgical electrochemistry

Anode-support system for the direct electrorefining of cement copper
Part I: Process conditions using horizontal rotary cathodes, 240
Influence of Ge^{4+} and Pb^{2+} ions on the kinetics of zinc electrodeposition in acidic sulphate electrolyte, 556
A kinetic and electrochemical study of the zincate immersion process for aluminium, 659
An electrochemical study of reduced ilmenite carbon paste electrodes, 823
A voltammetric investigation of the oxidation of pyrite in nitric acid solutions: relation to treatment of refractory gold ores, 852
Anode-support system for the direct electrorefining of cement copper
Part II: Process conditions using a circular cell with vertical rotary cathode, 1052

Molten salt electrochemistry

Electrolyte wetting effects in the comparative polarization behaviour of the hydrogen evolution reaction at Ni-Mo-Cd electrodes in $KF \cdot 2HF$ and $KOH \cdot 2H_2O$ melts, 6
Electrorefining of aluminium scrap from chloride melts, 34
Electrochemical formation of Pd-Li alloys in LiCl-KCl eutectic melts, 48
Comparison of the behaviour of glassy carbon and some metals for use as nonconsumable anodes in alumina-cryolite melts, 106
Zinc oxoacidity properties in molten LiCl-KCl eutectic at 450°C, 166
Development of a rotating ring-disc electrode for high temperature studies in cryolite-based melts, 456
Role of free F^- anions in the electrorefining of titanium in molten alkali halide mixtures, 671
Cathodic process and cyclic redox reactions in aluminium electrolysis cells, 809
Electrochemical behaviour of perrhenate ions in molten alkali fluorides, 886
Kinetics and mechanism of the magnesium electrode reaction in molten magnesium chloride, 940
Electrodeposition of refractory metals (Ti, Zr, Nb, Ta) from molten salt electrolytes, 993
Evaluation of low-temperature cryolite-based electrolytes for aluminium smelting, 1098
Preparation of neodymium-iron alloys by electrolysis in a fused chloride bath, 1139

Solid state electrochemistry

Electrochemical removal of both NO and CH_4 under lean-burn conditions, 203
A novel miniature zirconia gas sensor with pseudo-reference
Part III: Simple implementation for the determination of air-to-fuel ratio, 208

Photoelectrochemistry

Photoemission of electrons into electrolyte from cadmium oxide layers formed by anodic oxidation of undeformed and plastically deformed cadmium plates, 699
Photoelectrochemistry and the environment, 1067

Thermodynamics and properties

Diffusion through a multilayered phase in electrochemical systems: an approach by numerical inversion of the Laplace transform, 41
In-situ comparison of diffusivities for hydrogen and deuterium in palladium, 61
Impedance spectroscopy study with H-doped ammonium uranylphosphate self supported membranes, 68
Physical properties of aqueous solutions containing $NaClO_3$ and/or $NaClO_4$, 291
Calculation of the impedance of noncylindrical pores
Part I: Introduction of a matrix calculation method, 326
Calculation of the impedance of noncylindrical pores
Part II: Experimental verification on pores drilled into stainless steel, 334
